"ELECTROMECHANIKI PC" is a growing company, specializing in the field of electrical installations and automation systems.

ABOUT COMPANY

"ELECTROMECHANIKI PC" was established in 2016 and is the expected evolution of "M. MICHALAROS ELECTROMECHANIKI", which has been active in the field since 2002 with as main task the installation of electrical and automation systems for public and private projects.

Her long experience, her professional status, the organization but also its ever-growing market position and ever-increasing presence on the market gives her the prestige and the credibility in all the projects it undertakes, with the ultimate goal of immediately and fully meeting the needs of its customers.

The company was established by Mattheos Michalaros, who has more than fifteen years of experience in the above activities. The well-trained human resources of the company, as well as its excellent know-how, ensure excellent quality in the provision of services to the projects it undertakes.

The company's characteristic is the flexible and functional scheme that follows, featuring:

- Administrative staff
- Scientific staff
- Technical staff
- Modern equipment that covers all the range of tasks it undertakes.
